Hi Liz,

Attached is the brix data from 2004 to 2018.

Cheers,

Devin

PLEASE BE CAUTIOUS This email was sent from outside of the company

Hi Victor,

That's great -- many thanks!

The most critical data that I need however are phenology including Brix data (info attached), is there any progress on that?

All the best,
Lizzie

Hi Lizzie,

I put together our climate data into an Excel file. The records go back to 2010, the data comes from 4 strategic sites: Osoyoos West & East, and Oliver West and East.

Cheers,
Victor

Hi Vic,

Please see email below. Any chance of getting some weather data to liz?

Cheers
Rob.

Hi Devin and Rob,

I hope this note finds all well with you both. I am following up (again) from our conversation in April. I am wondering if I can help in any way with pulling together any phenological (including Brix) soon-ish and then, also, historical climate data? We have a student ready to go on processing and cleaning data.

I will be in town next week -- at the BCGWC meeting on Monday so could meet there and free Tuesday to meet wherever is convenient to you (before 4pm) if meeting would help. (Rob, I am looking forward to your talk!) Of course, I am always happy to call to discuss anything, just suggest a time or two.

Thank you again for all your help on this, and please let me know what I can do to help.

All the best,

Lizzie

Dear Devin and Rob,

I hope this note finds all well with you both, and that Sebastian Farms vineyards have not been hit with some of the bud mortality Pat and Carl told me about.

I am following in regards to our meeting last month and wondering if there is anything I can do to help with the process of locating/collating/etc. historical phenological and related data to share?

In case it helps, I have attached a short outline of the data my lab needs to get moving on the models. Please let me know if you have any questions or there is anything I can do to help.

All the best,

Lizzie
