Hi Mira and Lizzie!

Hope you both enjoyed the weekend!

Just wanted to send a quick update before you guys come down this week!

Monitoring went well overall last week, however I had to work around sprays at Nk'mip so I was only able to visit once. I've had to move flags around quite a bit to avoid damaged clusters at all sites, but have also made notes in a new column in the spreadsheet when damage was consistent in flagged clusters on a vine. I used a scale of 1-3. Most of the damage was mild, but some vines weren't in great shape overall. Hopefully the notes in the spreadsheet make sense. I've also uploaded a few more photos, with plans to take more at Quails Gate on my next visit.

Plans changed at Quails Gate, and they decided to spray this week so it doesn't sound like I'll be able to monitor there tomorrow. However the re-entry should be good by Thursday so if we still wanted to sample there it sounds like it should be alright. I can check again on Wednesday with Judy if we decide to go.

I've got a few general questions but I think it will be easier to discuss in person so I'll leave that until we meet!

Lizzie, I've let Mike at Dark Horse know you'll be coming by tomorrow on your way in. I'll also make sure to remind all the managers of our Brix visit the day before.

I think you both have my cell number, but just incase it's 250-488-4386. I'll get email notifications to my phone as well, but feel free to text me once you're in town if you prefer.

I hope you both have a safe drive down tomorrow, looking forward to the meet up!

Warmest Regards,
April
