Hi Mira and Elizabeth,

I hope your week has gone well! Just wanted to give another short weekly update.

I did my last monitoring for bloom at Quails gate on Tuesday, and am now transitioning to the weekly walk-throughs until veraison. I will take that time to remove flags from any of the vines that were removed from the study.

I did my second walk through at Nk'mip, Dark Horse, and McIntyre this week. It is really interesting to see the cluster development, and I am keeping rough notes on berry size as well as making sure to feel for softening of berries and looking for colour change. However, veraison has not started yet, but seems to be fairly close at Nk'mip and Dark Horse for some varieties. I will definitely keep you guys posted on when it starts!

I uploaded my data (so far) to the google drive, however I've been keeping it all in one spreadsheet for ease of access, so I posted it outside of the individual folders. I hope that is alright, it's working really well for me to have one ongoing spreadsheet that I just keep adding to.

Other than that things have been pretty laid back since I'm just doing the vineyard walk throughs. My hours have been much lower the past few weeks, however I am eager to see veraison start up and spend more time out in the field!

Let me know if there is any questions you have!

Enjoy the rest of the weekend!

Warm Regards,

April

Hi April,

Thanks for the update!

I think it makes sense to post it as one spreadsheet. Can you make a joint folder? I think that will be easiest for the future.

I hope you had a good weekend!

Mira

Hi Mira,

I can absolutely make a joint folder!

I'm also wondering if I should be moving flags for clusters that have lots of damage? See photo below;

I visited Nk'mip and Dark Horse today and still no veraison. I imagine the dates on the protocol were just estimates of when it would begin for early varieties? The berries are getting quite large but are still hard and no colour change.

Best,  
April

Hi April,

I think I missed this question. Yes, please move the flags to a representative cluster.

Have a good weekend!

Mira
